Course Name	Explain the Regulatory Framework for Quality Management Systems
Course Level	5
Course Credits	5
Course Duration	Three days
Cost of Course	R 2 800,00 per delegate (excluding 15% VAT)

Course Overview

The course equips delegates with an understanding of Quality Management Systems, and the framework which supports them. Beneficial for those required to understand how the legal system operates in the country and the broad regulatory framework within which Quality Management Systems operate.

This highly interactive and practical course is designed to provide delegates with a sound knowledge of all elements involved in Quality Management System practice or profession to:

- Provide a broad overview of how the law works in the country.
- Demonstrate an understanding of legislation applicable to the Quality Management Systems environment.
- Demonstrate an understanding of the relationship between legislation and Quality Management Systems standards and conventions.
- Explain the application of legislation and law.

Quality Management System

Who Should Attend?	<ul style="list-style-type: none"> Those seeking knowledge related to the regulatory framework.
Course Objectives	<ul style="list-style-type: none"> The fundamental objective of the course is to help delegates learn of Quality Management Systems important legislation that is related. Importantly, appreciate how the legal aspect impacts our understanding of the Quality Management System.
Benefits	<p>Benefits of this course include:</p> <ul style="list-style-type: none"> Improved knowledge and understanding of statistical process control. Technical skills of control charts.

Course Content

Course Modules	<p>Course modules consist of:</p> <ol style="list-style-type: none"> The concepts of the state, society, and the law and the relationships between them are explained with the Constitution. An explanation is given of how the Constitution of the Republic of South Africa supersedes all other legislation. The structure of the South African Legal System is explained to distinguish the levels within the system and procedures of each level in the hierarchy. The relationship of these Acts to the Constitution is explored to see how they strengthen and enhance what the Constitution says. The relevant definitions in these Acts are identified and discussed to provide the basis to understand the legislation. The legislative framework within which QM policies are developed and QM activities take place is discussed to ensure compliance with the law. Relevant sections of these Acts are identified and discussed to emphasise their importance and significance in the QMS environment. The relationships and linkages between these Acts are explored and their impact on the QMS environment is explained so that a holistic approach to QMS is developed. Quality Management Systems standards and conventions are identified and discussed to show how they contribute towards the development and maintenance of quality.
-----------------------	--

	<p>10. The relationship between Quality Management Systems standards and conventions and national legislation is explained to show the importance of synergy between these aspects.</p> <p>11. The violation of legislation and Quality Management Systems standards and conventions is explained in terms of their impact on the Quality Management Systems environment.</p>
Certification and Assessments	<p>All delegates who complete the summative assessment will be assessed, moderated, and receive a SOR (Statement of Results). Thereafter a Certificate of Competence from WWiSE (or SETA for qualifications) will be issued.</p>

About WWISE

Who are we?

World Wide Industrial & Systems Engineers (WWISE) is an ISO consultancy, training, business solutions, and systems implementation firm based in Southern Africa that provides clients with effective business processes management solutions in preparation for ISO compliance. The solutions we provide and implement allow our clients to compete favourably in modern competitive business environments, both locally and internationally. We also strive to be the leading training providers in SHERQ, ISO, Engineering, Finance, Business, and Project Management.

What do we do?

Our services are aimed at the improvement of quality, efficiency, knowledge, and competitiveness of client companies. This service range includes:

- ISO and SHERQ Systems implementation services, whereby we assist clients in meeting the requirements of (but not limited to) ISO 9001, 14001, 22000, 31000, 27001, 20000-1, 50001, and ISO 45001 Standards.
- Integrated Management Systems development whereby we integrate several business systems and management solutions into a single management system to comply with standards.
- Training of all employees (Shop Floor to Executive Management) in the fields of SHERQ, Engineering, Finance, Business, and Project Management to meet job responsibilities and expertise requirements of International Standards.
- ISO and Legal Auditing which includes Gap Analysis Audits, Product, Process, Procedural, and Systems auditing by our registered SAATCA Auditors.
- Customised web-based solutions integrating current systems to be in line with ISO requirements.

We are a Level 1 BBBEE Contributor that specialises in systems development, consultancy, training, and auditing.
